

L-491

The Nationwide Rivers Inventory, a registry of rivers that are potentially eligible for Wild and Scenic River designation, is available in CD-ROM format for use with GIS Arc/Info and ArcView software. The CD-ROM allows you to map NRI segments in association with additional data layers including Wild & Scenic Rivers, county and state boundaries, cities, HUC boundaries, federal rivers and trails, latitude and longitude lines, etc.

For more information, or to order a free copy of the NRI CD-ROM, contact Sheila Lee at:

Rivers Home

The Nationwide Rivers Inventory (NRI) is a listing of more than 3,400 free-flowing river segments in the United States that are believed to possess one or more "outstandingly remarkable" natural or cultural values judged to be of more than local or regional significance. Under a 1979 **Presidential directive**, and related **Council on Environmental Quality procedures**, all federal agencies must seek to avoid or mitigate actions that would adversely affect one or more NRI segments. The NRI is a source of information for statewide river assessments and federal agencies involved with stream-related projects. For any group concerned with ecosystem management, the inventory can provide the location of the nearest naturally- functioning system which might serve as a reference for monitoring activities. It also serves as a listing of plant and animal species for restoration efforts on a similar section of river. For the recreationalist, it provides a listing of free-flowing, relatively undisturbed river segments.
