REPORT OF THE 2004 GAME TAKE HUNTER SURVEY

Hunter game take questionnaires were mailed to 32,000 randomly selected hunting licensees on January 28, 2005. These individuals represented approximately 10.8 percent of the total number of licenses sold (295,737) in 2004. A follow-up mailing consisting of the entire hunter game take questionnaire was sent to nonrespondents on March 31, 2005. There were 35 questionnaires returned undeliverable, resulting in a total of 31,965 possible respondents. A total of 8,810 persons returned the questionnaire, representing approximately 3.0 percent of the total number of licenses sold. It was determined through survey data analysis that in 2004 there was a total hunting effort of approximately 251,192 hunters who spent and estimated 5,424,105 days in the field.

For the past several years, follow-up mailings to nonrespondents have significantly increased response to the questionnaires. In addition, a prize drawing was offered again this year in an effort to further increase questionnaire response. These increases in response rates reduce nonresponse bias, the phenomenon of more successful individuals (e.g., hunters) being more inclined to return a questionnaire than unsuccessful or nonparticipating individuals. Nonresponse bias is one of the principle causes of inflated bag and hunter-use figures in surveys of this type. Statistical analysis of survey data indicated high validity for species pursued by large number of hunters.

This survey has been a cooperative effort between the Wildlife Programs Branch and License and Revenue Branch. For more information concerning this survey please contact Wildlife Biologist Patrick Lauridson (916-445-3701).

* 1991 and prior hunter surveys did not separate wild pheasant hunters from LGBC hunters. 1992-2004 hunter numbers exclusively represent wild pheasant hunters.

** 1989-1999 hunter surveys did not separate wild chukar hunters from LGBC hunters. 2000-2004 data are a combination of both hunter classifications.

*** 1992-2004 sage grouse hunter data are extrapolated from hunter permits.
