**Notes:**

- We recommend driving into the area on the afternoon before the next day's fishing. This is an extremely windy road, compounded by the size of boat or trailer you pull. Allow at least 2.5 hours from I-80 west of Forest Hill. Average speed over Mosquito Ridge Road is 25-10 mph with MANY curves and switchbacks. Allow more time from Placerville via stumpy meadows.
- Troll main body of lake near dam and mouth of narrows in summer for kokanee salmon in spring summer, and fall.
- Good fishing for rainbows and browns in narrows and upper lake throughout the year.
- Troll deep with plugs or jig with spoons for mackinaw during spring and fall.
