Re: Plan and schedule on LL Anderson Spillway Modifications

Dear Mr. Jones:

In our letter dated October 18, 2005, we granted you a one-year extension to submit a plan and schedule for the modifications to the spillway on the L.L. Anderson Dam, FERC Project No. 2079. The purpose of this letter is to add an additional condition to the one-year time extension.

Your September 16, 2005 letter requesting a one-year time extension stated that the reason for the request was that you were awaiting the outcome of House Bill (H.R.) 2864, the Water Resources Development Act of 2005. If enacted, this legislation would affect the portion of the spillway improvement accomplished by PCWA and the cost sharing agreement with the Corps of Engineers. H.R. 2864 was passed by the U.S. House of Representatives and was submitted to the Senate on July 18, 2005.

The congressional budget office presently estimates that the bill will be acted on in early 2006. Please submit a plan and schedule for the spillway improvement project on the L.L. Anderson Dam within one month after H.R. 2864 is passed or within one month after the date it becomes clear that the bill is not approved.

Your continued cooperation in this aspect of the Commission's program is appreciated. If you have any questions, please contact Mr. John Onderdonk at (415) 369-3339.

Sincerely,

TAKESHI YAMASHITA

Takeshi Yamashita, P.E.
Regional Engineer
