Subject: Middle Fork American River Project (FERC Project No. 2079-069) 
Response to the Commission’s Questions and Clarifications Regarding Supplemental Filing

Dear Secretary Bose:

The following response is provided to the Federal Energy Regulatory Commission (FERC or Commission) to address questions and provide clarifications regarding Placer County Water Agency’s (PCWA) Supplemental Filing for the Middle Fork American River Project (MFP or Project). The Supplemental Filing was eFiled by PCWA with the Commission on November 30, 2011 to augment information currently available to the Commission for consideration in its National Environmental Policy Act (NEPA) analysis.

In a letter to PCWA dated December 14, 2011, the Commission identified questions and requested clarification on the Supplemental Filing. The following provides each of the Commission’s questions/comments followed by PCWA’s response. Copies of this response were provided to all parties on the MFP distribution list (Attachment A) and a Certificate of Service is provided in Attachment B.

Commission Question/Comment No. 1:

Is it PCWA’s intent that Alternative 1 replace their proposed action contained in their application for new license?

PCWA Response No. 1:

The Supplemental Filing includes a description and analysis of an alternative (Alternative 1) to PCWA’s Proposed Action included in its Application for New License (also referred to as the Final License Application [FLA]). Alternative 1 was developed after submittal of the FLA and incorporates: (1) revised instream flow and reservoir minimum pool conditions and additional recreation enhancements included in the resource agencies preliminary conditions and recommendations; and (2) revised management plans that PCWA and resource agencies reached consensus on in November 2011 (see Response No. 3). Alternative 1 was analyzed by PCWA in the Supplemental Filing to identify environmental impacts of implementing select resource agencies preliminary conditions and recommendations filed on August 5, 2011, as modified by the consensus reached on three management plans identified in Response No. 3. PCWA supports the conditions and recommendations included in Alternative 1 and is currently collaborating with MFP stakeholders to resolve minor differences in several monitoring plans identified in Table 1 of this submittal.
However, as stated in the Supplemental Filing Section 1.0 (page 1-1), "The No-Action Alternative and PCWA’s Proposed Action described and analyzed in the FLA remain unchanged." Alternative 1 does not replace the Proposed Action. PCWA recommends that both the Proposed Action and Alternative 1 be analyzed by the Commission in its NEPA document.

Commission Question/Comment No. 2:

*Please provide a roadmap that outlines, in a matrix or table format, the differences between Alternative 1 and PCWA’s proposed action and the differences between Alternative 1 and the preliminary terms and conditions that have been filed for the project.*

PCWA Response No. 2:

Attachment C includes Table 1 that identifies the differences between Alternative 1 and PCWA’s Proposed Action and the differences between Alternative 1 and the preliminary conditions and recommendations that have been filed for the MFP.

Commission Question/Comment No. 3:

*Your Supplemental Filing indicates that Alternative 1 is a result of consensus reached between PCWA and several stakeholders on a variety of resource issues. However, your filing did not include any letters of support from any stakeholder. Please provide documentation, from these stakeholders, that shows their support of Alternative 1.*

PCWA Response No. 3:

The Supplemental Filing did not indicate that Alternative 1 in its entirety was a result of consensus reached between PCWA and several stakeholders, but rather that Alternative 1 included revised management plans developed in consensus with MFP stakeholders. As stated in the Supplemental Filing Section 1.0 (page 1-1), "Alternative 1 was developed after submittal of the FLA and incorporates: (1) revised instream flow and reservoir minimum pool conditions and additional recreation enhancements included in the resource agencies preliminary conditions and recommendations (CDFG 2011; DOI 2011; USDA-FS 2011); and (2) revised management plans that PCWA and the MFP stakeholders reached consensus on in November 2011 (refer to Section 6.0)."

Further, as stated in the Supplemental Filing Section 6.0 (page 6-3),

"Since filing of alternative conditions, PCWA has continued to work with a broad stakeholder group (including state and federal resource agencies, non-governmental organizations, Native American Tribes, and members of the public) to reach consensus on select management and monitoring plans provided in the resource agencies preliminary conditions and recommendations.

Following submittal of resource agencies preliminary conditions and recommendations, PCWA conducted formal meetings with MFP stakeholders to discuss the Vegetation and Integrated Pest Management Plan (VIPMP) (October 4, 2011); the Historic Properties Management Plan (HPMP) (October 26, 2011); and the REC 4 - Contingency Whitewater Boating Study (Focus Group Meetings on August 15, 2011 and October 19, 2011). In addition, there were numerous informal communications between PCWA
technical specialists and resource agencies to discuss technical components of the VIPMP, HPMP, and the Transportation System Management Plan (TSMP), including e-mails and telephone conversations.

In November 2011, PCWA and MFP stakeholders reached consensus on revisions to the VIPMP (Attachment 1A), TSMP (Attachment 1B), and HPMP (Volume 3). It is anticipated that the resource agencies will be filing with the Federal Energy Regulatory Commission (FERC or Commission) these revised stakeholder-agreed upon management plans as modified preliminary terms and conditions for the MFP.

This Supplemental Filing provides an analysis of these revised stakeholder agreed upon management plans. Specifically, the Supplemental Filing includes an analysis of:

- Vegetation and pest management activities described in the VIPMP agreed upon by the MFP stakeholders in November 2011;
- Road and trail maintenance activities described in the TSMP agreed upon by the MFP stakeholders in November 2011; and
- Project effects on cultural resources with consideration of site-specific management measures and general procedural requirement described in the HPMP agreed upon by the MFP stakeholders in November 2011.

PCWA would like to clarify that it reached a verbal consensus with the United States Department of Agriculture-Forest Service (USDA-FS) and California Department of Fish and Game (CDFG) on the aforementioned management plans. PCWA has contacted the USDA-FS and CDFG about providing written support for the revised VIPMP, TSMP, and HPMP included in Alternative 1. Both resource agencies have stated that they will file a letter shortly with the Commission affirming their support and approval of the management plans.

PCWA looks forward to continuing to work with the Commission, resource agencies, Native American Tribes, and other interested parties on the MFP relicensing. If you have any questions regarding PCWA's responses, please contact Andrew Fecko, PCWA Resource Planning Administrator at (530) 823-4889 or by e-mail at afecko@pcwa.net.

Sincerely,

PLACER COUNTY WATER AGENCY

Andrew Fecko
Resource Planning Administrator

Certificate of Service
CERTIFICATE OF SERVICE

Pursuant to the provisions of 18 C.F.R. § 385.2010, I hereby certify that I have this day served the foregoing document to the Federal Energy Regulatory Commission, upon each person designated on the official service list compiled by the Secretary, and all interveners and stakeholders to the relicensing proceedings for Project No. 2079, as set forth in the attached distribution list, by e-Filing and e-Service (upon receipt of FERC’s Acceptance for Filing e-mail). In addition, I have mailed via courier service, one courtesy copy of this document to FERC’s Office of Energy Projects and one courtesy copy to FERC’s Office of General Counsel-Energy Projects.

Dated at Auburn, CA this 11th day of January 2012.

Andrew Fecko
Placer County Water Agency
Resource Planning Administrator

</table>

Condition No. 31 – Streamflow and Reservoir Elevation Gaging Plan**

Condition No. 31 required continued consultation with USDA-FS, CDFG, and State Water Board to finalize the plan provided in the FLA and submit for USDA-FS approval.

Streamflow and Reservoir Elevation Gaging Plan (SREGP) (PCWA Alternative Condition No. 31)**

PCWA continued consultation with resource agencies on the SREGP following submittal of preliminary conditions and recommendations. This consultation resulted in revisions to the plan. The revised SREGP was submitted as an Alternative Condition by PCWA. However, the resource agencies are currently reviewing the revised plan. Alternative 1 includes analysis of the revised SREGP submitted as PCWA Alternative Condition No. 31.

Although minor revisions may be required to secure stakeholder consensus on this plan, PCWA believes that the overall objective of the plan is not in question and any future changes will not impact the analysis associated with this plan under Alternative 1 in the Supplemental Filing.
