File No. 01030A
Electronically Filed

Kimberly D. Bose, Secretary
Federal Energy Regulatory Commission
888 First Street, N.E.
Washington, DC 20426

SUBJECT: Clarification Regarding Placer County Water Agency’s Middle Fork American River Project (FERC Project No. 2079-069) Proposed Action

Dear Secretary Bose:

On January 9, 2013, Placer County Water Agency (PCWA) participated in a telephone call with Ms. Carolyn Templeton of the Federal Energy Regulatory Commission (FERC or Commission), resource specialists from Louis Berger Group (FERC’s consultant), and representatives of the United States Department of Agriculture – Forest Service (USDA-FS or Forest Service) to discuss the Forest Service’s Final 4(e) Conditions for PCWA’s Middle Fork American River Project (MFP or Project). During the call, FERC requested that PCWA provide a summary of the Proposed Action for the relicensing of the MFP, based on negotiations with the relicensing participants that occurred subsequent to submittal of PCWA’s Application for New License. Further, FERC requested that PCWA provide a list of the most current management and monitoring plans that should be considered in the Proposed Action evaluated by the Commission in its environmental document for the MFP relicensing. This letter provides the requested information.

Proposed Action

In general, the Proposed Action that should be analyzed in the Commission’s environmental document includes:

- Addition, removal, and modification of Project components;
- Revisions to the existing FERC Project boundary;
• Changes in Project operations;
• Modification of testing and routine Project maintenance activities;
• New environmental programs, measures, and facilities designed to protect, maintain, or enhance environmental and cultural resources; and
• Construction or modification of Project facilities.

Specifically, PCWA does not object to certain terms and conditions (listed in Attachment C, Table 1) that were filed by the Forest Service on December 3, 2012, pursuant to Section 4(e) of the Federal Power Act. These terms and conditions represent the consensus that was ultimately reached between PCWA, the Forest Service, and other stakeholders following PCWA’s submittal of its Application for New License and supplemental filing of Alternative 1, and the Forest Service’s filing of its preliminary terms and conditions. As such, PCWA supports including those terms and conditions as part of the Proposed Action analyzed in the Commission’s Final Environmental Impact Statement (FEIS) for the MFP relicensing. Attachment C, Table 2 is a list of the specific management and monitoring plans associated with the Final Section 4(e) Conditions identified in Table 1.

Implementation of Forest Service Final 4(e) Condition No. 34 (Recreation Plan) requires changes to existing Project recreation facilities and the construction of new Project recreation facilities and features. As PCWA stated in its November 1, 2012 response to comments on the Draft EIS, these activities, which are summarized in Table 3 (Attachment C), should be analyzed in the Commission’s FEIS; PCWA supports analyzing them as part of the Proposed Action. Similarly, implementation of Forest Service Final 4(e) Conditions 22, 23, 24, 32, 34, and 46 requires the modification of existing Project facilities and/or the construction of new Project facilities. These construction projects identified in Table 4 (Attachment C) should be analyzed in the Commission’s FEIS.

PCWA’s Supplemental Filing (filed with FERC on November 30, 2011) includes a comprehensive assessment of impacts associated with modification of existing and construction of new Project facilities and Project recreation facilities and features. PCWA recommends that the FERC utilize (either directly or by reference) the information presented in the following sections of PCWA’s Supplemental Filing (November 30, 2011) in the Commission’s analysis of the Proposed Action in the FEIS:

• Section 3.0 – Environmental Effects Analysis; identifies impacts to all resource areas from modification of existing and construction of new Project facilities and Project recreation facilities and features to be implemented.
• Appendix A – Modified or New Facility Construction Activities and Concept Designs; includes a description of construction activities, as well as avoidance and protection measures and best management practices to be implemented.
Appendix E – Construction Air Quality Emissions Model; includes the air quality emission model output for construction projects to be implemented.

Other sources of information that should be utilized either directly or by reference to assess construction-related impacts include:

- The Recreation Plan (November 2012) and Transportation System Management Plan (November 2012), both of which include avoidance and protection measures and best management practices to be implemented during modification and enhancement of existing Project recreation facilities and water supplies, new Project recreation facilities, improvements to select dispersed use areas, and road and trail improvements.

- Information/analysis presented in PCWA’s Draft California Environmental Quality Act (CEQA) Supplement, which was filed with FERC on December 6, 2012.

PCWA eFiled this letter with the Commission’s Secretary, utilizing the Commission’s eFiling system. Courtesy copies of this letter (1 paper copy and 1 electronic copy) have also been mailed via courier service (concurrent with this filing) to the Commission’s Office of Energy Projects. In addition, PCWA provided a copy of this filing to each party designated on the attached distribution list via eService, or by mailing paper/electronic copies (refer to Attachments A and B).

If you have any questions regarding this filing, please contact me at (530) 823-4889 or by e-mail at bransom@pcwa.net.

Sincerely,

Benjamin Ransom
Environmental Scientist

</table>

\(^1\) The plans and measures identified on this table supersede all previous versions of the same name, including those referenced in the text of any management or monitoring plan or measure submitted during the relicensing proceeding to date, and those referenced in PCWA’s License Application (filed February 23, 2011) and in PCWA’s Supplemental Filing (filed November 30, 2011).

PCWA reserves the right to disagree with provisions that may be added to these plans or measures in the future as a result of required periodic updates.

Upon license issuance, the FERC-approved version of specific management and monitoring plans will supersede all previous versions.

\(^2\) With the exception of entries identified as TBD, copies of these management and monitoring plans were included in the following document filed by the USDA-Forest Service on December 3, 2012: Forest Service Final Conditions and Recommendations Provided Under 18 CFR § 4.34 (b)(1) in Connection with the Application for Relicensing for the Middle [Fork] American River Project (FERC No. 2079) dated 29 November 2012.

\(^3\) TBD = To be Developed after License Issuance

\(^4\) PCWA currently implements an Invasive Mussel Protection Plan that was developed in September 2010 in compliance with State of California Fish and Wildlife regulations. This plan was not included in the Forest Service Final 4(e) Conditions.

¹ Refer to Recreation Plan (November 2012) for specific requirements related to recreation facilities.

² This facility was maintained under the current license, but was not listed as a MFP facility.

³ This facility will be converted to the McGuire Group Campground.

⁴ This facility replaces the Ralston Afterbay Sediment Removal Access Point.
