

Data to be Collected through Proposed Recreation Surveys

The following is a preliminary list of data that PCWA proposes to collect through user surveys. These data would be used to identify issues (for example the need for more flows or higher reservoir levels) and to evaluate potential issues identified by the stakeholders.

Trip Profile

- Point of trip origin
- Sites visited during a particular trip
- Other sites visited during a particular trip
- Length of stay
- Number in party

Visitor Characteristics

- Motivations for visiting the study area
- Primary activities
- Other activities

Demographic Profile

- Age of people in party
- Income level
- Education level
- Ethnicity

Site Characteristics

- General satisfaction with trip to this site
- Satisfaction by activity
- Perceptions regarding the condition of Project recreation sites
- Perceptions regarding the amenities present at Project recreation sites
- Perceptions regarding crowding
- Perceptions regarding opportunities associated with Project recreation sites
- Satisfaction with reservoir levels
- Satisfaction with flow levels
- Satisfaction with access conditions
- Satisfaction with aesthetic conditions

Recreation Spending

- Amount of money spent on trip.
- Portion spent in Placer County.

Activity-Specific – Angling

- Satisfaction with access conditions
- Satisfaction with flow levels
- Fishing success
- Availability of information about angling opportunities
- Availability of flow information
- Safety concerns

Activity-Specific – Whitewater Boating

- Satisfaction with access conditions
- Satisfaction with flow levels
- Availability of flow information
- Satisfaction with trip
- Safety concerns
